West Conesville Sewer District Customers

Subject: Resumption of West Conesville Sewer District Operations

This letter is to advise you the Town of Conesville has received the agreed upon budgeted amount from the DEP to operate the West Conesville Sewer District. It was unfortunate the Town of Conesville had to suspend the next phase of the project which included connection of individual septic tanks at each residence. However, stopping operations was the only way to get the DEPs attention. Your patience during that time is greatly appreciated.

What can be expected next? In the very near future individual septic tanks will be connected to the Wastewater Treatment Facility if that process has not already started by the time you have received this letter. You will be contacted in advance by the contractor to schedule the work at your residence which usually should take no more than a day.

Once all connections are made and the Sewer District is fully operational, you will receive your first semi-annual bill for \$50.

Lastly, I would like to be more timely in future communications with the West Conesville Sewer District Customers. I realize some people do not have internet access and we will continue to communicate with them by regular mail. However, if you wish to receive timelier communications, please provide your name and email to me at federicebill@gmail.com and I will add you to the email list we are setting up.

Sincerely,

Bill Federice, Town Supervisor
